

MINDQUEST MINGLE

Siguldas Valsts ģimnāzijas 12. a klases skolnieces-
Ērika Pudņika, Džūlija Gailīte, Estera Serkova

Target audience

Our project's target audience are students who face difficulties in mastering the study material

Solution idea

1

In your opinion, what disturbs students from being motivated to learn?

There are often multiple reasons why students may not feel motivated to learn, such as stress, teaching methods, extracurricular activities, and life outside of school.

2

How to prevent boredom in the learning process?

Teachers could make their lessons more engaging, even planning a lesson to be different from the daily routine at least once a month.

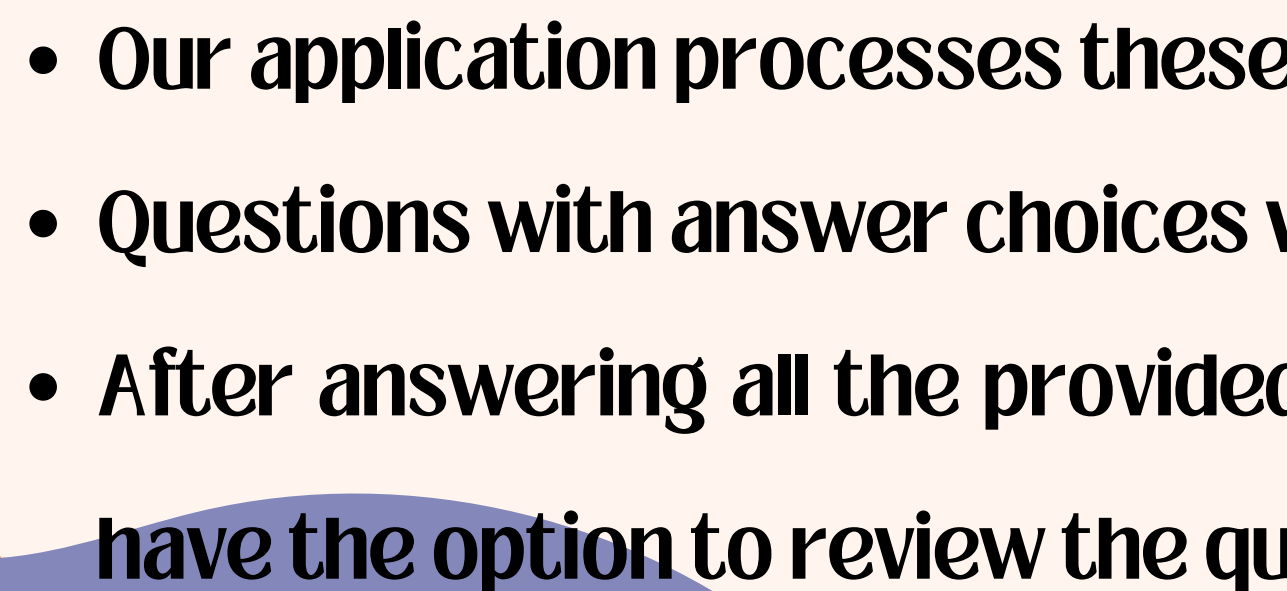

3

In your opinion, what could help students?

Our created application could significantly assist students in better preparing for exams in various subjects by posing questions that are generated based on the file uploaded by the student.

THE WEBSITE

Instruction manual (step by step)

- **Start with logging in or registering in your account (to save your progress and increase your overall score).**
 - **Then, you'll find educational materials in the form of files that you can upload to our application (PDF, DOC, XLSX).**
 - **Our application processes these files and generates questions.**
 - **Questions with answer choices will appear on the screen for the user.**
 - **After answering all the provided questions, your results will be displayed, and you'll have the option to review the questions and incorrect answers.**
-
